

Get the Most Out of Your Fleet

Take advantage of the most comprehensive vehicle upfit, remanufacturing and fleet services

UNICOR offers one of the most comprehensive Vehicle Upfit, Remanufacturing, and Fleet Services to a wide selection of government entities such as the Army, the Marine Corps, the Navy, all of the department of Homeland Security's border patrol vehicles, and other law enforcement branches like the Bureau of Indian Affairs.

With our in-depth knowledge of the federal procurement process, and a long history of fleet services, UNICOR can meet your needs quickly and

conveniently. We work with General Terms and Conditions (Form 7600A and 7600B), MIPRs (Military Interdepartmental Purchase Requests), federal contract awards, and more.

Our nationwide facilities are fully equipped and operate in both a Lean Six Sigma Manufacturing Techniques and ISO 2001:9000 manufacturing environment. This allows UNICOR to turn around your vehicles cost-effectively, in a short time frame, and to provide outstanding quality and customer focus.

Our Capabilities and Beyond

Our other capabilities extend across several categories, including prototyping and customization; a wide range of vehicular modifications, upfits and 'de-retro' services; complete vehicle refurbishing services from assessment to delivery.

Also included in our capabilities is VMIS, our comprehensive Vehicle Management Information Systems technology, designed to

keep you informed about all important aspects of your fleet, including budgeting, acquisition, capital improvement and disposal management, tracking, repair, and maintenance work orders. This unique software solution permits fleet managers to control operating expenses through fuel and oil management, licensing, and the negative aspects as a result of bad equipment usage.

Prototypes and Customization

Prototyping and customization services are possible through UNICOR. Our mechanical technicians have a broad knowledge of military and agency vehicle specifications. Our range of expertise includes:

- Design and redesign of vehicular components
- Development of customized upfits/upgrades for tactical vehicles
- Prototype development and testing to meet exacting military or agency requirements
- Vehicle redesign to meet strict fuel-efficiency standards and emission regulations

Vehicular Upfit/De-Retro Services — From A to Z

UNICOR provides a wide range of vehicular modifications, upfits, and 'de-retro' services to meet the unique and demanding requirements of the federal government and military. We will work with you to assess your mobile asset needs. We have extensive knowledge of and experience with military, law enforcement, medical and fire platform requirements to work with you to plan the necessary vehicle modifications and upfits.

Fleet Heavy Equipment Remanufacturing Services

UNICOR offers complete refurbishing services from assessment to delivery. Through our knowledge of military, agency and law enforcement vehicle regulations, we can work with you to assess your vehicles, recommend needed refurbishments, and write modification work orders and customized statements of work.

Standard UNICOR capabilities and remanufacturing processes:

- Rebuilding and upgrading – from just a few components to entire vehicles
- Upgrades to current military, government and law enforcement safety codes and operational standards
- Equipped to provide the latest vehicle technical innovations
- Only OEM-specified parts used in our remanufacturing program
- All work meets safety and performance requirements
- Vehicle exterior and chassis work performed, plus the remanufacture or replacement of engine components, transmissions, differentials, brakes, and more
- Vehicles road tested before delivery
- Work fully guaranteed
- Like-new, upgraded components or vehicles delivered to the location of your choice

Custom Painting Operations

UNICOR's Fleet Factories contain state of the art 65' X 20' down draft paint booths, 65' X 20' media blast booths and 65' X 20' wash bays.

- Painting of armored tracked vehicle hulls and automotive fleets
- Painting of trailers and various equipment up to 60' in length
- Painting and re-purpose/modification of ISO shipping containers (command and control units, storage units, etc.)
- Powder coating
- Bed liner application

Many Advantages of Working with UNICOR

- Standardization – UNICOR takes a consistent approach to upfitting vehicles in keeping with the relevant agency statement of work (SOW). This means drivers will be able to switch vehicles with ease. This also reduces spare parts inventory and overall fleet maintenance costs.
- UNICOR federally certified procurement agents can purchase vehicles for you from GSA Auto Choice, simplifying your process.
- Vehicles, UTVs, ATVs, and Heavy Equipment may be delivered directly to one of several UNICOR facilities across the nation where work is performed in accordance with your approved SOW.
- UNICOR's extensive machine shop capabilities allow us to fabricate specialized components such as custom grill guards, cargo barriers, security screens, gun safes, computer mounts, truck vault storage, and more.
- UNICOR is uniquely qualified to provide the latest items of customer interest including radio installation, prisoner cameras, IR cameras, radar units, custom molded seating, and more.
- Upon completion, UNICOR can deliver the newly retrofitted or upfitted vehicle/vehicles to the location of your choice – mission-ready.
- De-retro and auction services are available – UNICOR can pick up dead lined mobile assets and de-retro them at one of our facilities, refurbishing and reusing specialized components on new retrofit orders where possible, place the vehicle and non-sensitive items on GSA auction, and credit the proceeds to your account for additional allocation.
- Asset data – online status reports and asset data are available through the UNICOR reporting dashboard, where you may view the real-time status of your vehicles as they proceed through the factory, with downloadable reports and critical asset data to facilitate your program management.
- Payment options – as a component of the United States Department of Justice, we accept General Terms and Conditions (Form 7600A and 7600B) and Military Interdepartmental Purchase Requests (MIPRs). We also accept federal contract awards. With our in-depth knowledge of the federal procurement process, we can meet your needs quickly and cost-effectively to provide unmatched customer service.
- Reliability – all work is warranted and fully guaranteed.
- Law Enforcement vehicles upfit by UNICOR

VMIS (Vehicle Management Information Systems)

Government fleet managers can take advantage of a comprehensive fleet asset life-cycle management service solution through VMIS, an internet-based M5 Fleet Management Software tool from AssetWorks. This all-encompassing software covers all aspects of the management of your fleet. VMIS management tools provide:

- Budgeting, acquisition, capital improvement and disposal management
- Tracking, repair, and maintenance work orders
- Controlling operating expenses, fuel, oil, licensing, and equipment usage
- Generating standard or custom reports
- Reducing administrative and Information Technology costs.

License Plates

UNICOR manufactures license plates for the federal government. In addition, UNICOR will load initial information into the GSA FMVRS database. Things to know:

- Authorization to purchase license plates from UNICOR is limited to individuals with relevant fleet manager approval.
- Individuals having received authorization from fleet managers can view the range of plates for which they are authorized to order by logging into the UNICOR License Plate Store on [UNICOR.gov](https://unicor.gov).
- UNICOR does not manage the Federal Motor Vehicles Registration System (FMVRS) application. For assistance with the FMVRS system, please contact the GSA Fleet Technical Support Team.

Making Change Possible

The Federal Prison Industries program (now operating under the trade name UNICOR) was established in 1934 by an Executive Order issued by President Franklin D. Roosevelt. Today, the program continues to operate at no cost to taxpayers and benefits communities across the Nation creating safer prisons and reducing inmate recidivism.

Social responsibility underscores everything we do. By providing a platform of job and life skills training along with work experience, we increase offenders' chances of securing meaningful post-release employment and becoming a contributing member of society.

Research shows that offenders who participate in the UNICOR program are 24% less likely to return to criminal activity and 14% more likely to obtain employment upon release from prison compared to those without similar experience.

UNICOR invests in America by reducing crime, and its costs and consequences. For every dollar spent on correctional industry programs, a substantial amount is saved in future criminal justice costs (e.g., arrests, convictions, incarceration, crime victimization and post-release supervision).

Ultimately, UNICOR helps keep America safe, reduces public assistance costs, and compensates victims of crime. It also supports local businesses via the purchase of raw materials, promotes the viability and health of our communities, and effectively reduces crime's revolving door.
